VR / AR Solutions

Custom Software Development

Enterprise Mobility

Technology Consulting

Quality Assurance & Testing

Software Support & Maintenance

Idea

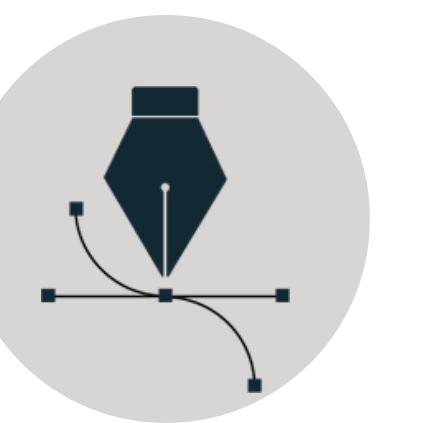

To analyse the requirement through in-depth research with the help of brilliant tools.

Sketch

To draft the design that is related to the research in order to check the feasibility.

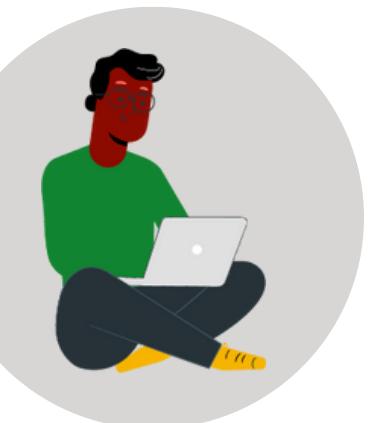

Design

After completing the feasibility test, a final design is prepared by using best practices.

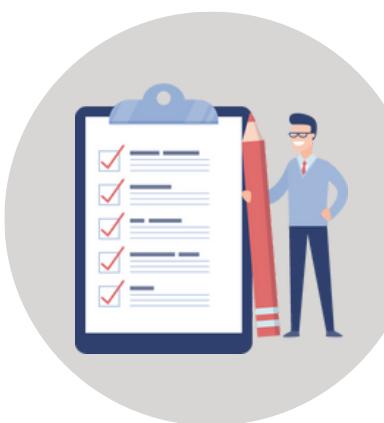

RedBlox Process

Develop

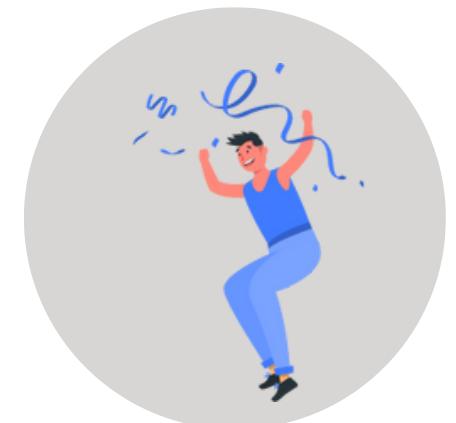

Now, our development team starts developing the solution according to the approved designs.

Test

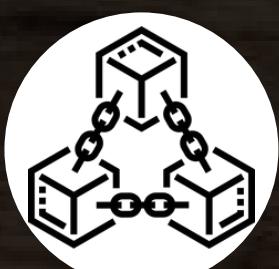

In the testing phase, we test every component to make sure that the end product is completely Bug-Free.

Celebrate

Product is Now LIVE. Your Business is on a Leap as your product will now be used by millions Globally.

Engagement Models

Fixed Price

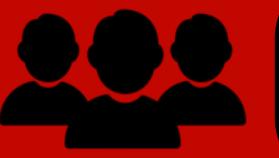

When your requirements are clear, with agreement on scope, very well-defined specification, timeline, and cost.

Rigid model, any changes to the scope would impact the overall timelines and deliverables.

Fixed Capacity

Resources will work on a dedicated basis at an agreed competitive hourly rate, this is the ideal engagement model when your requirements are evolutionary in nature and helps you control the pace of the development.

Team Model

Dedicated Team of Developers will work for 9 hours a day 5 days a week at a fixed monthly cost inclusive of system, and infrastructure.

On Demand Staffing

Hire any resources on demand for as little as 100 hours a month.

Dedicated Pods

Here we build an exclusive setup with your company's branding. A centre for you to scale, experiment, and innovate.
